I. LIST OF FIGURES ................................. IX

II. ABBREVIATIONS ............................... XI

IIIA. SUMMARY ................................. XIII

IIIB. ZUSAMMENFASSUNG ....................... XV

1 INTRODUCTION ............................... 17

1.1 THE BASE OF MODERN NEUROSCIENCE .......................... 17

1.2 THE DEVELOPMENT OF THE NERVOUS SYSTEM .................. 17

1.3 THE HIPPOCAMPUS .......................... 18

1.4 CHEMICAL SYNAPSES ...................... 20

1.5 FORMATION OF SYNAPTIC CONTACTS ...................... 23
  1.5.1 AXON GUIDANCE AND PATH-FINDING .................. 23
  1.5.2 SYNAPTIC ASSEMBLY ....................... 24
  1.5.2.1 PRESYNAPTIC ASSEMBLY ................... 26
  1.5.2.2 POSTSYNAPTIC ASSEMBLY ................... 26
  1.5.3 INDUCTION OF SYNAPSE FORMATION IN THE CNS ....... 27
  1.5.3.1 PRIMING FACTORS ......................... 28
  1.5.3.2 INDUCTIVE SYNAPTGENIC FACTORS .......... 28
  1.5.4 MATURATION AND ELIMINATION OF SYNAPSES .......... 30
  1.5.5 THE TRIPARTITE SYMPHONY ................. 31

1.6 THE EXTRACELLULAR MATRIX ............... 34
  1.6.1 GENERAL CHARACTERISTICS OF THE EXTRACELLULAR MATRIX .... 34
  1.6.2 ECM-MOLECULES IN THE CNS ............... 35
  1.6.2.1 GLYCOAMINOGLYCANS ..................... 35
  1.6.2.2 PROTEOGLYCANS ......................... 37
  1.6.2.3 GLYCOPROTEINS ......................... 38
  1.6.2.4 ECM-RECEPTORS ......................... 40
  1.6.2.5 PERINEURONAL NETS AND THE ECM AT SYNAPTIC SITES .... 42

2 MATERIAL & METHODS ...................... 44

2.1 COMPANIES ............................... 44

2.2 EQUIPMENT ............................... 45

2.3 SOURCES FOR ANTIBODIES, CHEMICALS, ENZYMES AND CONSUMABLES ...... 45
  2.3.1 PLASTICWARE .......................... 45

2.10.4 Electrophoresis of PCR Products 66
2.10.5 Cloning and Transfection of PCR Products 66
2.10.6 Isolation of Plasmid DNA 66
2.10.7 Digestion of DNA-Fragments 67

2.11 Electrophysiology 67

2.12 Microscopy 68
2.12.1 Fluorescence Microscopy 68
2.12.2 Phase Contrast Microscopy 68
2.12.3 Quantification of Synaptic Puncta 68

2.13 Counting and Statistical Analysis 69

3 Results 70

3.1 In vivo expression of CSPGs and other extracellular matrix proteins in the developing E18 hippocampus 71

3.2 In vitro model systems 79

3.3 Initial characterization of used cell types 79

3.4 Microisland assay 81
3.4.1 Characterization of matrix components in the microisland assay 81
3.4.2 Electrophysiological recordings in the microisland assay 84

3.5 The cell-insert co-culture system 87
3.5.1 Survival of neurons in the cell-insert co-culture assay 87
3.5.2 Polarization of hippocampal neurons in the cell-insert co-culture system and the characterization of neuronal subtypes 89
3.5.3 Expression of ECM components in the cell-insert co-culture system 91
3.5.4 Expression of synaptogenic factors and ECM-related proteins in the cell-insert co-culture system 93
3.5.5 Expression of synaptic proteins in the cell-insert co-culture system 96
3.5.5.1 Quantification synaptic puncta 98
3.5.6 Comparison between different supporting cell types 98
3.5.7 Degradation of ECM components in the cell-insert co-culture system 101
3.5.8 Biochemical analysis of conditioned media from the cell-insert co-culture system 107
3.5.9 Electrophysiological recordings of hippocampal neurons in the cell-insert co-culture system 109

4 Discussion 112

4.1 Technical considerations 113

4.2 Role of ECM-molecules for structural and functional synapses 118

4.3 Expression of ECM-molecules in the CNS 124
