# Contents

## Introduction

1 Preliminaries

1.1 Moments spaces and bijections

1.1.1 Orthogonal polynomials

1.1.2 Spectral measures

1.2 Random matrices

1.2.1 Integration on matrix spaces

1.2.2 Matrix-valued random variables

2 Random moments of scalar measures

2.1 Moments of measures on a compact interval

2.2 Moments of measures on the half-line

2.3 Moments of measures on $\mathbb{R}$

2.4 Spectral measures of the classical ensembles

3 Matrix moment spaces

3.1 Matrix measures

3.2 A characterization of matrix moment spaces

3.3 Matrix orthogonal polynomials

4 Random matrix moments

4.1 Moments of matrix measures on $[0, 1]$

4.2 Moments of matrix measures on the half-line

4.3 Moments of matrix measures on $\mathbb{R}$

4.4 A large deviation principle for matrix measures
5 Appendix 103
  5.1 Random measures ................................................. 103
  5.2 A representation by real matrices ............................... 106

List of Symbols 109
