Abstract 1

Zusammenfassung (German summary) 3

1 Preface 13
  1.1 Comprehension 13
  1.2 Objective 14

2 Birth – Life – Death 17
  2.1 Genealogy 17
  2.2 Stellar Evolution 17
  2.3 High-Mass Versus Low-Mass Star Formation 20
  2.4 The Importance of Protostellar Physical Parameters 21

3 Classification of Protostars 23
  3.1 Lada’s Classes 23
  3.2 A Near-Infrared Classification 25
  3.3 How To Identify True Protostars – Class 0 26

4 Herbig–Haro Energy Sources 29
  4.1 Herbig–Haro Objects 29
  4.2 Protostar Candidates 30
  4.3 Observation and Data Reduction 31
    4.3.1 JCMT 31
    4.3.2 MRT 32
    4.3.3 HHT 32
    4.3.4 Image Restoration and Flux Extraction 32
  4.4 Calculation of Physical Properties 33
    4.4.1 Grey-body Fit 33
    4.4.2 Luminosities 34
    4.4.3 Masses and Densities 35
  4.5 Line Contamination of Continuum Flux 36
  4.6 Observed Sources 39
    4.6.1 HH 7–11 39
