Abstract .......................................................................................................................... x

1 Introduction .................................................................................................................... 1

1.1 Motivation ................................................................................................................... 5

1.2 Scope of the Study ...................................................................................................... 9

1.3 Organization of the Study ......................................................................................... 10

2 Foreign Affiliation and Poverty: Conceptual Orientation ........................................... 11

2.1 Foreign Direct Investment and its Types ..................................................................... 11

2.1.1 Foreign Direct Investment and Growth ............................................................. 13

2.1.2 Foreign Direct Investment- Growth- Poverty Nexus .......................................... 15

2.1.3 Types of Foreign Direct Investment .................................................................. 17

2.1.4 The Link between Foreign Affiliation and Poverty ........................................... 19

2.1.4.1 Changes in Prices of Exports and Imports .............................................. 19

2.1.4.2 Employment, Income and Prices of Factors of Production .................... 20

2.1.4.3 Government Revenues and Exclusive Programs for Poor ...................... 23

2.2 Conceptualization of Poverty: Definitions and Attributes ........................................ 23

2.2.1 Poverty Assessment and Measurement ............................................................. 25

2.2.2 Poverty Line ....................................................................................................... 26

2.2.3 National Poverty Lines ...................................................................................... 27

3 Theoretical Foundation, Research Design and Methodology ................................... 28
3.1 Theoretical Background

3.2 Case Study as Experimental Approach of the Empirical Study

3.2.1 Counterfactual Impact Evaluation

3.2.2 Quasi-perfect Counterfactuals

3.3 Case Study Design: Questionnaire, Sampling and Survey

3.3.1 Questionnaire, Definition of Interview Groups and Sample Size

3.3.2 Administering the Survey

3.3.3 Sampling

4 Profile of the Case Study Area

4.1 Profile of Pakistan

4.1.1 Socio-Economic Profile

4.1.2 Poverty Trends in Pakistan

4.2 Characteristics of Rural Livelihoods

4.2.1 Agriculture and Seasonality

4.2.2 Gender

4.3 Field Research Area; Sialkot City

4.3.1 The Football Stitching Industry in Sialkot

4.3.2 Traditional Organization of the Football Stitching Industry

4.3.3 Atlanta Agreement

4.3.4 Working Units

5 Descriptive Analysis of Low-Income Rural Household’s Data

5.1 Research Variables of the Study

5.2 Socio-economic Characteristics of the Rural Community

5.2.1 Availability of Infrastructure in the Community

5.2.2 Availability of Education Facilities in the Community
5.2.3 Availability of Health Services in the Community ........................................... 61

5.3 Characteristics of Low-income Rural Households ............................................ 61

   5.3.1 Household Attributes: Energy, Water Source and Type of House Material .... 62

   5.3.2 Demographic Characteristics of Low-income Rural Households ............... 66

      5.3.2.1 Household Size of Low-Income Rural Households ............................ 67

      5.3.2.2 Age Composition of Low-Income Rural Households ......................... 69

      5.3.2.3 Proportion of Females in Low-Income Rural Households .................. 71

      5.3.2.4 Dependency Ratio of Low-Income Rural Households ...................... 73

   5.3.3 Economic Variables of Low-income Rural Households .............................. 74

      5.3.3.1 Average Income of Low-Income Rural Households .......................... 74

      5.3.3.2 Employment Status of Low-Income Rural Households ....................... 75

      5.3.3.3 Female Work Participation in the Low-Income Rural Household .......... 78

   5.3.4 Statistics of Employees of Low-Income Rural Household ......................... 79

      5.3.4.1 Age of Employees ............................................................................. 79

      5.3.4.2 Human Capital ................................................................................ 81

   5.4 Summary of Results ....................................................................................... 82

6 Linking Foreign Affiliation to Low-Income Rural Households: Empirical Tests ... 84

   6.1 Group Mean Differences .............................................................................. 85

      6.1.1 The Kruskal-Wallis Test ...................................................................... 86

      6.1.2 Graphical Representation of Three Data Groups; Box Plots ................. 89

      6.1.3 Mann-Whitney Test ........................................................................... 92

   6.2 Empirical Analysis: Ordinary Least Square Regression ............................. 97

      6.2.1 The Econometric Model ...................................................................... 98

      6.2.2 Practical Issues in Regression Analysis: ............................................. 99

      6.2.3 Discussion on OLS Regression ............................................................. 100
6.3 Ordinary Least Square (OLS) Regression: Four Models ........................................101
   6.3.1 Regression 1: Aggregate Data Set....................................................................102
   6.3.2 Regression 2: Direct Treatment Group ............................................................105
   6.3.3 Regression 3: Indirect Treatment Group..........................................................108
   6.3.4 Regression 4: Control Group ...........................................................................110
6.4 Confidence Interval ..............................................................................................112
6.5 Simulations ...........................................................................................................115
   6.5.1 Simulation of Average Per Capita Income Using Mean Dependency Ratio ...119
   6.5.2 Simulation of Average Per Capita Income Using Lower Bound and Upper Bound of Mean Dependency Ratio .................................................................123
6.6 Comparative Analysis of the Findings ................................................................125
7 Summary and Conclusion .......................................................................................131
Bibliography ..............................................................................................................135
Appendices ..................................................................................................................151

Appendix I: Analytical Relationship between Research Variables .............................151
Appendix II: Group Differences: (Complete Data Set - to Direct Treatment Group) ....154
Appendix III: Group Differences: (Complete Data Set - to Indirect Treatment Group) ....154
Appendix IV: Group Differences: (Complete Data Set - to Control Group) ...............155
Appendix V: Group Differences: (Direct Treatment group - to Indirect Treatment) .......155
Appendix VI: Group Differences: (Direct Treatment Group - to Control Group) ........156
Appendix VII: Questionnaire _ Community ................................................................157
Appendix VIII: Questionnaire _ Household ...............................................................163
Appendix IX: Questionnaire _ Employees ..................................................................174
Appendix X: Questionnaire _ Working units .............................................................178
