Table of contents

I. List of Figures i
II. List of Tables ii
III. List of Abbreviations iii
IV. Abstract v

1. General introduction 1
   1.1. Stress 2
       1.1.1. Measuring stress by salivary cortisol 3
       1.1.2. Laboratory stressors 4
   1.2. Stress and memory 5
   1.3. Olfaction 8
   1.4. Odours and memory 11
   1.5. Startle paradigm 13
   1.6. Aims of the dissertation 15

2. Experiment 1: The influence of stress on eye fixation as a facilitator for memory enhancement 16
   2.1. Introduction 16
   2.2. Methods 17
       2.2.1. Participants 17
       2.2.2. Experimental procedure 18
       2.2.3. Material 19
           2.2.3.1. Stress and control procedure 19
           2.2.3.2. Physiological stress measures 21
           2.2.3.3. Affect measurement 21
       2.2.4. Eye tracking recordings 21
       2.2.5. Areas of Interest 22
       2.2.6. Memory assessment 23
       2.2.7. Statistical analyses 23
   2.3. Results 24
       2.3.1. Participants 24
2.3.2. Stress induction
   2.3.2.1. Physiological stress measures 24
   2.3.2.2. Affect measurement 26
2.3.3. Memory performance 27
2.3.4. Fixation measures 29
2.3.5. Correlations between the variables 32
2.3.6. Mediation analyses 32
2.3.7. Committee faces 33

2.4. Discussion 33
   2.4.1. Stress induction 33
      2.4.1.1. Physiological stress measures 33
      2.4.1.2. Affect measures 34
   2.4.2. Memory measures 34
   2.4.3. Object fixation 34
   2.4.4. Face fixation 35
   2.4.5. Relations between the variables 36
   2.4.6. Conclusion 36

3. Experiment 2: Odour perception and memory 24 hours after its involvement in a stressful episode and enhancement of the startle response 37
   3.1. Introduction 37
   3.2. Methods 39
      3.2.1. Participants 39
      3.2.2. Experimental procedure 39
      3.2.3. Material 41
         3.2.3.1. Stress and control procedure 41
         3.2.3.2. Physiological stress measures 41
         3.2.3.3. Affect measurement 42
      3.2.4. Trait questionnaires 42
      3.2.5. Startle evocation 42
      3.2.6. Data recordings 43
      3.2.7. Startle stimuli 43
         3.2.7.1. Olfactory stimuli 43
         3.2.7.2. Visual stimuli 44
3.2.8. Startle data processing 45
3.2.9. Statistical analyses 45

3.3. Results 45
3.3.1. Participants 45
3.3.2. Physiological stress measures 46
3.3.3. Affect measurement 48
3.3.4. Trait questionnaires 49
3.3.5. Startle responses 49
   3.3.5.1. Olfactory startle paradigm 51
   3.3.5.2. Visual startle paradigm 51
3.3.6. Subjective odour ratings and odour recognition 51

3.4. Discussion 52
3.4.1. Stress induction 53
   3.4.1.1. Physiological stress measures 53
   3.4.1.2. Affect measures 53
3.4.2. Startle responsivity 53
3.4.3. Subjective odour ratings and odour recognition 55
3.4.4. Conclusion 55

4. Experiment 3: Odour and object memory in the immediate aftermath of a stressful episode and its enhancement of startle responsivity 56
4.1. Introduction 56
4.2. Methods 57
   4.2.1. Participants 57
   4.2.2. Experimental procedure 57
   4.2.3. Material 58
      4.2.3.1. Stress and control procedure 58
      4.2.3.2. Physiological stress measures 59
      4.2.3.3. Affect measurement 59
   4.2.4. Social Interaction Anxiety 59
   4.2.5. Startle evocation 59
   4.2.6. Data recordings 60
   4.2.7. Startle stimuli 60
      4.2.7.1. Olfactory stimuli 60
4.2.7.2. Visual stimuli 61
4.2.8. Startle data processing 61
4.2.9. Memory assessment 61
4.2.10. Statistical analyses 62

4.3. Results 62
4.3.1. Participants 62
4.3.2. Physiological stress measures 63
4.3.3. Affect measures 65
4.3.4. Social Interaction Anxiety 66
4.3.5. Startle responses 66
4.3.6. Odour recognition and odour ratings 67
4.3.7. Memory performance 68

4.4. Discussion 70
4.4.1. Stress induction 70
4.4.1.1. Physiological stress measures 70
4.4.1.2. Affect measures 70
4.4.2. Startle responsivity 70
4.4.3. Subjective odour ratings and odour recognition 71
4.4.4. Memory measures 72
4.4.5. Conclusion 72

5. General discussion 73
5.1. Summary of the main findings 73
5.1.1. Experiment 1 73
5.1.2. Experiment 2 73
5.1.3. Experiment 3 74
5.2. Stress induction 74
5.3. Fixation and attention 75
5.4. Memory 78
5.5. Olfaction 82
5.6. Startle responsivity 85
5.7. Clinical implications and practical application 89
5.8. Limitations 91
5.9. Future directions 93
5.10. General conclusion
   5.10.1. Concluding “bigger picture”
   5.10.2. Conclusion of the thesis
