Contents

1. Background .......................... 1
   1.1. Long-range dependence ................. 1
      1.1.1. Fractional Brownian motion and fractional Gaussian noise ....... 3
      1.1.2. Subordinated Gaussian processes ................................ 5
   1.2. Change-point identification .............. 8
      1.2.1. Change-point problems .................. 8
      1.2.2. Wilcoxon change-point test ............. 11
      1.2.3. Self-normalized change-point tests .......... 14

2. Wilcoxon-type change-point estimators ....... 19
   2.1. Consistency ....................... 22
   2.2. Convergence rate ..................... 26
   2.3. Asymptotic distribution ............... 38
   2.4. Simulations ......................... 49

3. Subsampling for long-range dependent time series ... 55
   3.1. Sampling-window method ................. 55
      3.1.1. Auxiliary results .................... 59
      3.1.2. Consistency ........................ 66
   3.2. Simulations .......................... 71

4. Testing for change-points in LMSV time series .... 79
   4.1. Long Memory Stochastic Volatility model ........ 81
   4.2. The sequential empirical process of subordinated LMSV time series .... 82
      4.2.1. Martingale part ...................... 84
      4.2.2. Long-range dependent part .......... 94
   4.3. Change-point tests for LMSV time series ......... 95
      4.3.1. CUSUM tests for LMSV time series ...... 95
      4.3.2. Wilcoxon tests for LMSV time series .... 98
   4.4. Simulations ......................... 99

5. Data examples ........................ 117
   5.1. Nile river discharge ................... 117
   5.2. Northern hemisphere temperature ........ 118
   5.3. Ethernet traffic ...................... 120
Contents

A. Skorohod spaces 123
   A.1. Topologies on Skorohod spaces . . . . . . . . . . . . . . . . . . . . . . . 123
   A.2. Weak convergence in Skorohod spaces . . . . . . . . . . . . . . . . . . . 125

B. Modified Wilcoxon-type change-point tests 129
   B.1. Wilcoxon-based change-point tests for data with ties . . . . . . . . . . . 129
   B.2. Wilcoxon-based change-point tests for multiple breakpoints . . . . . . . . 131
